

Health Application of Scalar Energy

Scalar Energy, Inflammation and Healing

Studies conducted at Max Planck Institute showed that Scalar energy when applied to living cells promoted unclumping of cells.

In a diseases state or an injury there is swelling and stasis in blood and lymphatic circulation. Red and white cells tend to clump together.

When scalar energy is applied on the human body, the scalar wave both improves the biofield radiating outside the body and works internally permeates the body's tissues. This expansive effect causes relaxation and dilation of the peripheral blood vessels in the human body. This together with the unclumping of cells enhances overall circulation.

This helps bring relief to muscles and soft tissue injuries through increased circulation and accelerated production of compounds the body makes to heal. The increased blood circulation delivers oxygen-rich blood to injured muscles helping speed up the body's natural recovery process. With a reduction in tissue compression the swelling and pain associated with inflammation are reduced, thereby promoting healing.

Scalar energy could enhance the functioning capabilities of both the immune and endocrine systems. Scalar energy also has the ability to destroy viruses and bacteria. **Scalar Energy Cellular Nutrition and Detoxification**

Scalar energy facilitates unclumping of cells and enhance circulation. This allows the fluid to flow rapidly delivering nutrients to the cells and carrying waste away from the cells.

This scalar energy also improves the permeability of cell walls. Enhanced permeability helps facilitates the intake of nutrients into each and every cell and also aids the elimination of toxins from the cells.

In this way, optimum cellular nutrition and detoxification is maintained. This in turn facilitates optimum cellular performance and function. **Scalar Energy and Aging** The optimum functioning of all body organs and effective body function depends on mitochondria for energy production. When the mitochondria become dysfunctional cells begin to lose the abilities to produce energy effectively.

As one ages there is a corresponding decrease in cellular energy levels. Symptoms are acute tiredness, loss of libido or sexual dysfunction and susceptible to age related diseases.

Cells do not have enough energy supply are unable to carry out the process of apoptosis, the process of removing abnormal cells in structured and organized manner. This can lead to inflammation, degeneration and diseases cells, hence makes the body susceptible to a range of diseases.

Scalar energy is able to maintain optimum energy levels for healthy cellular function i.e. nurture the cells with an energy imbalance to be normal and healthy. This help to retard regeneration, age-related diseases may be prevented and hence slow down the ageing process. **Scalar Energy and Cancer**

Scalar Energy has the abilities to increase the energy potential (transmembrane potential) of the cell. Scalar energy can bring the energy level to the optimum -70 millivolts. Cancer cells are low energy cells (-15 millivolts), it proliferate to ensure survival. By raising cell voltage with scalar energy, the cell in question will no longer need to proliferate uncontrollably and hence retard the proliferation of cancer cells. **Scalar Energy and DNA**

Scalar energy can increase the energy covalent level of every single hydrogen atom in the body to its optimum energy potential. This fact has been verified by spectrographs. This finding is important as covalent hydrogen bonds are what hold DNA together. Scalar energy strengthens chemical bonds within DNA, making it more resistant to damage.

Scalar Energy and the Nervous System

The nervous system is extremely sensitive to electro-magnetic frequencies from the environment. Man is constantly bombarded by these fields of energy whether he is at home or at work. Computers, cellular phones, television, radio, hair dryers, electric blankets, microwave oven, high tension wires, all create 60 cycle magnetic energy that upsets your brain and nervous system and destabilizes the human body's electromagnetic field.

This frequency is able to interfere with the proper function of the nervous system, in turn lead to a disturbance of the body's homeostasis. There is evident in the medical field that links diseases like cancer and Alzheimer's with man make electro-magnetic radiation.

Symptoms such as headaches, lack of concentration, depression, frequent cold, hyperactivity in children, sleep disturbances, irritability could be the result of electro-magnetic stress.

Scalar energy's expansive and circular movement offers a field of protection shield around the body. In an attempt to further safe guard the body this subtle energy system maintains its energy sensitivities by not allowing these harmful energies to disorientate the body's system. This protective shield removes and cancels the effects of man made frequencies (60Hz) on the human body by enhancing the body's natural defenses against the

damaging radiation.

A brain has its own vibration to communicate within itself and the rest of the body. Relaxation is induced by alpha waves. These alpha waves have a frequency between 7-13Hz. The earth's electro-magnetic field frequency is called the Schumann Resonance also fall within the same frequency.

Scalar energy is able to promote alpha wave frequency in the brain. The brain then resonates at the same vibration as the earth's energy field and is able to amplify these vibrations. If this frequency is transmitted throughout the body, this assist the cells in the body achieve a particular resonance which is essential to optimum health.

Scalar energy also promotes a mind that is relaxed, more coherent, aware, creative, focused and sharp with improved clarity.
